

CFA CERTIFIED CAST-IN-PLACE FOUNDATION CONTRACTOR PROGRAM SEMINAR & EXAM

Successfully passing this exam establishes YOU
as a "Certified Foundation Technician"

Get in on the ground floor of a new industry program to certify foundation contractor firms in the residential cast-in-place industry.

Tomorrow
your proposal
will read
"I am a CFA
Certified
Contractor".
In ten years,
the RFP will
read "CFA
Certified
Contractor
required."

THURSDAY, MARCH 26 - MOUNT VERNON, IA

Check-In 7:30 am, Seminar 8-11am, Exam 11am-1pm

WHY: Many code jurisdictions now require, and many more soon will, contractors to be certified

WHY: Promotion of the CFA certification program to jurisdictions will make this the preferred program

WHY: Nationally-recognized certification separates your company from the competition in your local market

The CFA Foundation Contractor Certification is a broad-based effort with requirements in many areas of business management and foundation construction. Successful completion of this general knowledge exam is one of the requirements to obtain certification. Contact the CFA for full program details.

CERTIFICATION SEMINAR: This 3-hour seminar does not teach the exam but provides detail to many of the key fundamental areas that are covered by the exam. One hour is devoted to the current codes and standards affecting the residential concrete foundation industry and two hours are devoted to the technical details of today's residential foundations from concrete science to the construction process, including many critical details often overlooked such as waterproofing, backfilling and finished grade. In addition, complete information on the Certification Program and the full requirements will be presented.

CERTIFICATION EXAM: The pre-qualification exam for becoming a CFA Certified Contractor consists of 80 multiple choice questions covered in a maximum two-hour period. The exam is open book and based from the *Reference Package* obtained through the CFA. 70% is the pass/fail rate to establish your pre-qualified status for the next steps towards becoming a Certified Contractor. ***It is important that you purchase and study the Reference Package ahead of this exam.***

CERTIFICATION REFERENCE PACKAGE: Obtained through the CFA, this package compiles the primary resources of importance to the business of constructing quality poured concrete foundations. Although you may have many or all of these references currently in your company, this package combines them all into one location that is easy to reference and quick to use. The certification exam is open book but it is recommended that you obtain this *Reference Package* far enough in advance to be familiar with the information and its location for quicker reference during the exam process. Once the exam has been successfully completed, this package will be a key to your success as a certified contractor.

HOW SHOULD YOU PREPARE:

- Pre-register for this event using the form in this packet or visiting www.cfawalls.org
- **Expedite the delivery of your Certification Reference Package (see reverse side of this form) BY ORDERING THIS NOW**
