July 2005

Kansas City, Host to NAHB's CHBC Concrete Tour '05

The newly formed Concrete Home Building Council (National Association of Home Builders) had their 1st National Concrete Tour here in KC. They toured Miller Materials (Oldcastle), Lafarge Cement, & Hunt Midwest Materials.

Western Forms presented removable form concrete construction, the group toured a completed removable form all concrete home, toured Concrete Materials Ready Mixed Concrete Plant & ate KC BBQ and frozen concrete.

Participants toured Wall Ties and Forms Manufacturing Plant, learned about (ICF) Insulating Concrete Form Construction, visited an ICF jobsite and finally enjoyed a walk through of a completed and lived-in ICF home.

Everyone enjoyed the decorative demonstration of acid staining, stamping, overlays and spray down applications. The tent behind Ross Worely's concrete home provided shelter from the sun during a BBQ picnic.
